With seven years as a Frontend developer, I've specialized in creating seamless, user-focused interfaces using HTML, CSS, JavaScript, Typescript, React, React Native, Next.JS, Tailwindcss and many more. As Lead Developer on the Carbon project, I spearheaded UI component design and API integration, combining creativity with problem-solving to build high-performance, intuitive applications. I thrive on tackling complex challenges and delivering polished, responsive designs that enhance user experiences and drive product success always with a focus on delivering exceptional user experiences.

Skills

- ReactJS + NextJS
- Redux Toolkit and Zustand
- TailwindCSS
- HTML + CSS
- Javascript + ES6
- Typescript
- NodeJS + NPM
- Git
- Figma
- Team Reporting
- Communication

Work History

Lead React and React Native Developer - D3Maven

[May 2024 - present]

- Led the design, development, and launch of React and React Native applications, driving UI component creation and API integration.
- Mentored junior developers on best practices in JavaScript, ReactJS, and React Native, fostering skill growth and career advancement.
- Collaborated with cross-functional teams to deliver high-quality, user-focused solutions, ensuring seamless integration and performance.
- Acted as a subject matter expert in React, guiding teams through complex technical challenges and ensuring adherence to industry best practices.

Full-Stack Developer - Hungerlink

[Aug 2022 - present]

- Played a pivotal role in a high-impact project, contributing to the development of a cutting-edge web portal.
- Collaborated closely with the design team to create responsive and user-friendly interfaces.
- Exhibited strong problem-solving skills as a Backend Developer, efficiently completing API tasks to enable seamless integration with frontend applications.

Freelance React Developer - Upwork & Fiverr

[2019 - present]

- Worked as an independent contractor, completing multiple React projects for clients on Upwork and Fiverr.
- Successfully managed client expectations, ensuring that project goals were met, and often exceeded.
- Developed custom components, optimized performance, and maintained code quality to deliver exceptional user experiences.

Junior Frontend Engineer - GPT

[2018 - 2019]

- Gained initial industry experience as a Junior Frontend Engineer, learning the basics of web development and contributing to various projects.
- Collaborated with the senior team members, further developing my JavaScript skills and contributing to the growth of the company.

Education

Bachelors of Engineering: Software Engineering

[2016 - 2020] at the University of Buea - Cameroon
GPA: 3.31 / 4
